

DETAILED ACTION

1. Claims 26, 33-36, 39-44, and 49 are pending in the application. Claims 35, 39-44, and 49 have been previously withdrawn from consideration as drawn to a non-election invention.
2. Claims 26, 33, 34, and 36 are under consideration in the instant Office Action.
3. The rejection of claims 26, 33, 34, and 36 under 35 U.S.C. 102(b) as being anticipated by Rosen et al., United States Patent Application Publication No. US 2002/0052308 has been withdrawn in view of the arguments in the claim amendment filed 08/31/2009.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 26, 33, 34 and 36 stand rejected under 35 U.S.C. 102(e) as being anticipated by Lillie et al. (United States Patent Application Publication No. US20030124128A1, filed 06/21/2002; PTO 892).

Lillie et al. teach the nucleic acid sequence of SEQ ID NO: 48 encoding SEQ ID NO: 6 of the instant application (see alignment below), and methods for screening for the presence of breast cancer comprising screening for the said nucleic acid sequence of SEQ ID NO: 48 encoding SEQ ID NO: 6 of the instant application in a subject or biological sample from said subject. Thus, the reference teachings anticipate the claimed invention.

Conclusion

6. No claims are allowed.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian L Fronda whose telephone number is (571)272-0929. The examiner can normally be reached Monday-Thursday and alternate Fridays between 9:00AM - 5:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nashaat Nashed can be reached on (571)272-0934. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

8. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
